

## **Dr. Gregory Paul**

Gregory Paul is the manager of the Aquatic Resources Centre, a large interdisciplinary research facility which supports over 100 scientists whose studies span environmental and human health, aquaculture and understanding biological systems. Greg has worked at the University of Exeter for over 20 years where he also obtained his PhD in fish reproductive biology and eco-toxicology, with zebrafish as one of his key study species. Greg has had the fortune to study zebrafish in their natural environment and champions understanding of their natural history to support in-laboratory husbandry, care and welfare. Greg is also a Named Animal Care and Welfare Officer.
